

This impressive collection of essays written in memory and celebration of M M Thomas is a valuable contribution to the discussion, summarizing and critiquing of MM's work. It offers both solidity and freshness to his theological and missiological thinking and reflections on the biblical text and a fitting tribute to the dedicated, careful, and stimulating scholarship characteristic of M M Thomas. It will undoubtedly prove essential reading for scholars seeking to engage MM or those looking for a fresh entry into MM's theology.

M.M Thomas is well-known for his theological articulations published in English. This fine collection of essays brings out his often overlooked but equally significant Malayalam exegetical work on biblical books. The essayists here both celebrate and critically analyse MM's hermeneutical presuppositions, his ideological impulses, and the social, theological and missiological currents which undergird his biblical expositions. A major achievement of this volume is to create an appetite among its readers to seek out MM's original biblical commentaries.
